SUMMARY

I'm a passionate Frontend Developer in a MERN Stack Course, loving crafting smooth, responsive websites with HTML, Tailwind CSS, JavaScript, React, Context API, Redux and Firebase. I've built real-world projects solo and with teammates boosting my problem solving, teamwork, and creative skills. I'm now diving into Backend Development with Node.js, Express.js, and MongoDB, Next.js. I'm super excited to jump into React Native for mobile app development in the near future.
